BOOK SYNOPSIS

Well known for her Kitty Norville bestselling series, Carrie Vaughn has written *Martians Abroad*, a novel with great crossover appeal. Polly Newton has one single-minded dream, to be a starship pilot and travel the galaxy. Her mother, the Director of the Mars Colony, derails Polly's plans when she sends Polly and her genius twin brother, Charles, to Galileo Academy on Earth--the one planet Polly has no desire to visit. Ever. Homesick and cut off from her own plans for her future, Polly cannot seem to fit into the constraints of life on Earth, unlike Charles, who deftly maneuvers around people and sees through their behavior to their true motives. Strange, unexplained, dangerous coincidences centered on their high-profile classmates begin piling up. Charles may be right--there's more going on than would appear, and the stakes are high. With the help of Charles, Polly is determined to find the truth, no matter the cost.
